

Taziker is committed to protecting and enhancing the environment to contribute to the sustainable management of our environment.

This Energy policy is written to compliment the organisation's Environmental policy and, Carbon Reduction Policy and as such, should be read in conjunction with these. This policy covers all uses of energy in our buildings, processes, and transportation within our operations and the fuels consumed by the group to deliver our services in its operational activities.

Taziker is committed to.

- Reducing CO2 emissions
- A continuous improvement in the efficiency with which energy is used.
- The prevention and avoidance of energy waste.
- Investing in new technology, energy efficient services including plant and office equipment.

Our prime objective is to reduce our total energy consumption year on year and in summary, our vision is to reduce our energy costs, increase energy efficiency and decrease CO2 emissions with our use of fossil fuel and in turn increase our use of renewable energy & HVO's

We believe in preserving natural resources, reducing atmospheric emissions, and in part help to mitigate the effects of climate change.

We expect employees to support our objectives and to cooperate actively in achieving our goals, these goals will deliver a healthier and more sustainable environment to the benefit of our employees, customers, and the communities in which we operate.

Management will lead and promote energy efficiency programmes, with the purchase of energy-efficient products and services.

Which enables us to:

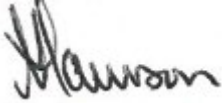

- Identify our major energy consumers in the organisation.
- Set achievable objectives and targets for reducing energy consumption.
- Develop an energy management action plan.
- Comply with legislation.
- Increase environmental and energy consumption awareness.
- Encourage all staff to 'do their bit'.
- Continuously improve our energy efficiency.

Taziker will ensure compliance with legal requirements to which the organisation subscribes related to energy performance, including energy efficiency and the use and consumption of energy. The organisation will also encourage the adaption of its operations and facilities to ensure compliance with future legal changes and will establish common standards for the management of energy efficiency in all areas of the business in which it operates.

To promote greater awareness among all its stakeholders, Taziker will provide them with reliable and transparent information regarding its energy consumption, its corresponding greenhouse gas emissions and the improvement actions undertaken.

Taziker considers compliance with this policy is the responsibility of all individuals who take part in the company's operations and activities.

This policy will be reviewed annually.
