

INDUSTRIAL SERVICES

An overview

WHO WE ARE

Taziker Industrial Services was founded to offer comprehensive industrial maintenance, shutdown, and project services within the power, energy and process sectors across the UK.

Our range of in house multi-disciplinary services are available to support our clients 24 hours a day, 7 days a week to ensure that we meet their requirements safely and on time.

We are proud and trusted to work with many Industrial clients including:

ACCESS SCAFFOLDING

A secure and meticulously managed approach for tasks performed at elevated heights. As fully accredited members of the National Access & Scaffolding Confederation (NASC), our skilled team collaborates closely with clients to deliver creative scaffolding solutions for both internal and external applications.

CONFINED SPACE RESCUE

Providing City & Guilds trained employees, we are certified to carry out confined space rescue services at low, medium, and high levels for all Taziker and client operatives.

Whether deploying a team or an individual, we are equipped to safely extract an injured person using various rescue techniques.

ROPE ACCESS

An expedited alternative to traditional scaffolding, this solution is perfect for locations that are hard to access at high levels. We are accredited by Industrial Rope Access Trade Association (IRATA) and have teams which possess extensive experience in height rescue, high level cleaning services, boiler clean / de-slag, non-destructive testing (NDT), bird and pest deterrent installations and mansafe wire handrail inspections.

THERMAL INSULATION

Investing in thermal insulation enhances your facility's efficiency and energy conservation, whilst safeguarding the asset itself.

Our skilled teams are trained to Thermal Insulation Contractors Association (TICA) standards and offer a range of services, from technical consultation to extensive plant insulation projects, catering to both large-scale renovations and expedited initiatives.

COMMITTED TO INNOVATION

Through continuous improvement we have established ourselves as a market leader by delivering cutting-edge technology and resources that enhance value for our clients, while also focusing on the development of new innovations for the industrial sector.

High Yield Scaffold Equipment

One of our major investments has come in the form of utilising High Yield Scaffolding tube throughout our Industrial Services business. The benefits of this investment have been:

- ✓ The weight to strength ratio is 20% lighter than standard Galvanised Scaffold tube, due to having a wall thickness of 3.2mm as opposed to 4mm
- ✓ Traditional 21' Galvanised Scaffold tube weighs 29kg, whereas the High Yield Scaffold tube is 23kg. This significantly enhances safety as scaffold operatives get less tired and are less likely to make mistakes.
- ✓ It has a higher yield strength of 355KN/mm², as opposed to a traditional Galvanised tube being 235KN/mm²
- ✓ More equipment per tonne is provided by using High Yield Scaffold tube, due to the lighter weight per metre of tube compared to standard Galvanised Scaffold tube

Our outstanding Health and Safety

At Taziker the most important aspect of our work is protecting our employees, clients and other contractors. We are renowned for our approach to the management of safety; this is reflected in our excellent HSQE performance.

Taziker is committed to continually improving the safety, health and wellbeing of everyone associated with our projects and this has informed the creation of our SAFE-T Golden Rules which are the visible representation of our behavioural safety culture:

- Be fit for work
- Use work equipment safely
- Use fall protection when working at height
- Follow the plans and permits in place
- Wear the correct PPE for the task
- Stop work if anything changes
- Report unsafe events and conditions

HEALTH AND SAFETY AWARD WINNERS

In 2025, Taziker won the RoSPA Gold Award for the fifth year in a row

Our outstanding Health and Safety

Mental Health Support

We recognise the significance of mental health support and actively participate in the Mates in Mind initiative. Additionally, Mental Health First Aiders are trained across all Taziker sites.

Safety Campaigns

Where they are delivered in a fun, informative and targeted way, safety campaigns, including posters, can be effective in conveying important information to our employees.

Appropriate Training

We are dedicated to providing our staff with the necessary training to perform their roles effectively, as well as any additional training they believe is essential for their professional development and enhanced performance.

Presentation and Workshops

We prioritise the organisation of these events to effectively communicate essential information to our teams and to gather and leverage their expertise.

Reporting

We have fostered a workplace culture that encourages our employees to report near misses and provide feedback on various issues. This practice enables us to examine underlying causes and recognise emerging trends.

Auditing and Safety Tours

Our management and safety teams conduct regular site visits to interact with personnel at all organisational levels. In addition, our directors perform audits on a quarterly basis.

Memberships and Accreditations

We are committed to delivering high quality work, with health, safety and wellbeing at the heart of our operations, as well as maintaining sustainability and the environment. Through this, we have been recognised within the industry, winning numerous awards and gaining a variety of certifications and professional memberships.

- Achilles (OGE) – Oil and Gas Europe
- Achilles UVDB – Certificate of Registration
- Building Confidence Level 5
- CHAS Advanced – Certificate of Accreditation
- CIRAS – Confidential Incident Reporting and Analysis System
- Constructionline Gold – Certificate of Membership
- FORS Bronze – Fleet Operator Recognition Scheme
- IRATA - Industrial Rope Access Trade Association
- ISOQAR – BS EN ISO 1090 – Structural Components for Steel Structures
- ISOQAR – ISO 9001 Quality Management
- ISOQAR – ISO14001 Environmental Management
- ISOQAR – ISO 45001 Health & Safety Management
- NASC – National Access & Scaffolding Confederation
- RoSPA – Gold award

Contact Us

Covering the UK, we provide a range of specialist industrial services with our experienced and highly skilled teams.

You can trust Taziker to deliver professional, innovative and cost-effective solutions, even in the most challenging environments.
